

2015 solar power rebates

Are solar rebates a good idea?

Rebates are a great way to save money on solar panels. Solar rebates are often tied to a specific utility and paid directly to the solar installer to reduce the customer's up-front cost of going solar. This reduction in cost affects the amount of solar tax credits you can receive.

Can you get tax credits for solar power?

Several states also offer tax credits for solar power. People who install solar in participating states earn extra money back on their state income tax bill the year after installation. All state solar tax credits can be claimed in addition to the federal government's investment tax credit.

What incentives are available to offset the cost of solar panels?

There are multiple solar incentive programs to help offset the cost of solar panels. Federal and state tax credits, rebates, and performance payment programs can help you save 30-60% or more off the initial costs to go solar.

What expenses are eligible for a solar tax credit?

According to the Internal Revenue Service, these expenses are eligible for the solar tax credit: Solar photovoltaic (PV) panels. PV cells used to power an attic fan (but not the fan itself). Contractor labor for on-site preparation, assembly, or original installation. Permitting fees, inspection costs, and developer fees.

Yes, but if the residence where you install a solar PV system serves multiple purposes (e.g., you have a home office or your business is located in the same building), claiming the tax credit can be more complicated. When the amount spent on the solar PV system is predominantly used for residential rather than business purposes, the residential credit may be claimed in full without ...

Rebates will be issued as a bill credit, which will appear on your GWP bill in 1 to 2 billing cycles, except for toilet and clothes washer rebates, which will be issued as a rebate check. Applications must be submitted no more than 12 months from the date of purchase.

While you can't get free solar panels, North Carolina solar rebates and credits help lower installation costs, making it more affordable to go solar. Power Purchase Agreements (PPAs) and solar leases allow you to have solar panels installed for little to no upfront cost, but you don't own the system and must purchase the electricity it generates.
