

How many GWh of energy storage is needed in 2025?

To maintain grid stability, Terna forecasts the need for 71GWh of storage, equivalent to about 20GW of capacity by 2030. The second edition of RENMAD Storage Italia (April 2-3, 2025) will bring together leading experts and industry leaders to discuss the evolving energy storage landscape, exploring both the opportunities and challenges ahead.

Could Italy's grid-scale battery storage market see a massive expansion?

Grid-scale battery storage |Cameron Murray writes about the nascent market for large-scale battery storage in Italy, which could see a massive expansion in the short term. Does Italy have a battery storage market?

This report is part of a series that analyses the battery storage market in select European countries. Italy has both a rapidly growing utility-scale market as well as a flourishing customer-sited battery storage market. Customer-sited storage adoption has been mainly driven by a combination of high electricity prices and generous tax incentives.

How many projects did EP Produzione win in the 2025 capacity market auction?

EP Produzione was awarded a total of five projects in the 2025 capacity market auction, each with a 15-year off-take contract. To continue reading, please visit our ESS News website. This content is protected by copyright and may not be reused.

The Energy Storage Global Conference (ESGC) is back! The conference's fifth edition will be held on 11 - 13 October 2022 and is organised by EASE - The European Association for Storage of Energy, with the support of the European Commission's Joint Research Centre, as a 100% hybrid event at Hotel Le Plaza in Brussels, as well as online.

Italy to hold first MACSE energy storage capacity auctions in H1 2025. By ... Minister of the environment and energy security Gilberto Pichetto has signed a decree allowing Italy to proceed with its energy storage capacity auction, known as MACSE, in the first half of 2025. ... BESS is key to the UK's net zero goals but significant challenges ...

They added that the projects are expected to reach ready-to-build (RTB) stage in early 2025. Developers Energy-Storage.news interviewed for a recent feature on Italy's burgeoning grid-scale energy storage market for Solar Media's quarterly journal PV Tech Power suggested durations would be around 4-5 hours, potentially up to 8.

Emerging Technologies. Artificial intelligence (AI) and digital technologies in the energy sector are expected to accelerate in 2025. AI-driven systems are increasingly being used to optimize grid management, improve energy efficiency, and predict demand patterns. These technologies are also being used in the wholesale electricity markets to optimize battery ...

The European Union's energy storage sector has witnessed significant advancements, particularly in 2023, with a record-breaking milestone of over 10 GW of cumulative storage installations. This growth is driven by the increasing adoption of battery storage technologies, especially in residential sectors across Europe, with Germany, Italy, and the UK leading the charge.
