Since the IRA passed, companies have announced US\$91 billion of investments in over 200 manufacturing projects, including US\$9.6 billion in 38 solar projects, US\$14.4 billion in 27 storage projects, US\$1.4 billion in 14 wind projects, and US\$54 million in six hydrogen projects, closely tracking investment levels in their respective renewable ...

Global investments in energy transition technologies have reached a record high of USD 1.3 trillion in 2022, but this is not enough. Annual investments need to at least quadruple to remain on track to achieve the 1.5°C targets. Renewable energy investments are also not following the pace needed to accelerate the energy transition and energy efficiency targets.

Renewable Energy Conferences 2024 2025 2026 is for the researchers, scientists, scholars, engineers, academic, scientific and university practitioners to present research activities that might want to attend events, meetings, seminars, congresses, workshops, summit, and ...
