Glossary for this table "Maximising returns" - refers to the battery largest battery bank size (in kilowatt-hours, kWh) that can be installed which the solar system can charge up to full capacity at least 60% of the days of the year. The figures in this table are for the largest recommended size; smaller battery banks will usually offer better returns.

Energy (kilowatt-hours, kWh) Energy, on the other hand, is more a measure of the "volume" of electricity - power over time. You'll usually hear (and see) energy referred to in terms of kilowatt-hour (kWh) units. The place you'll see this most frequently is on your energy bill - most retailers charge their customers every quarter based (in part) on how many kWh of electricity they ...
