

A mothership in the solar system

Could an alien mothership be in the Solar System?

A draft paper by a Harvard scientist and the head of the Pentagon's UFO office has raised the idea an alien mothership could be in the solar system, sending out tiny probes dubbed "dandelion seeds" to explore the planets within. Could recent objects be alien probes from a mothership sent to study Earth?

M. Kornmesser/NASA The official in charge of a secretive Pentagon effort to investigate unexplained aerial incursions has co-authored an academic paper that presents an out-of-this-world theory: Recent objects could actually be alien probes from a mothership sent to study Earth.

Should we look for evidence of transmissions from our Solar System?

In a recent study, two researchers from the University of Liège and the Massachusetts Institute of Technology (MIT) recommend that we look for evidence of transmissions from our solar system.

The Mothership is a large alien Ship originating from the Galilean Squids. It appears inside Callisto, and launches once Callisto is nuked. The Mothership features a triangle hull equipped with two turrets and 3 engines at the back, It ...

The Siphoning Ship is a large alien ship originating from Galilean Squids. It appears inside Callisto and is activated by placing around 5 Drills anywhere on Callisto. It does not cast much weapons, nor have anything that can kill the player, but causes an ending. Both the Mothership and the Siphoning ship can be activated together. The Siphoning Ship is made of a big ...

A mysterious cigar-shaped object spotted tumbling through our solar system last year may have been an alien spacecraft sent to investigate Earth, astronomers from Harvard University have suggested.

Officials at the Department of Defense claimed it is possible for aliens to send small probes to our solar system, and even to Earth, on missions similar to the ones conducted by NASA, according ...

The first known interstellar object to visit our solar system, 1I/2017 U1 "Oumuamua, was discovered Oct. 19, 2017 by the University of Hawaii's Pan-STARRS1 telescope, funded by NASA's Near-Earth Object Observations (NEOO) Program, which finds and tracks asteroids and comets in Earth's neighborhood. While originally classified as a comet, observations revealed ...

It would be vital to know if they are lone probes or if they have a mothership. A mothership might allow specialization that wouldn't require humans for probe reproduction. It could also just be a spore that crop dusts probes as it passes through star system. Then the grow op begins. Too bad this is all tucked away behind a

A mothership in the solar system

curtain.

Pentagon officials have warned that an alien mothership in our solar system could be sending probes to Earth.. A recent report published by the US intelligence hub noted how "parent craft ...

Last July 26, Congress held a hearing on the issue of UAPs, where lawmakers and a large crowd of spectators listened as a former Air Force intelligence officer testified that the U.S. government is...

Pentagon officials said in a draft document last week that aliens could be visiting our solar system and releasing smaller probes like missions conducted by NASA when studying other planets.. A ...

US Pentagon Gives A Nod To UFOs, Director Says Alien Mothership Could Be In Our Solar System Last week, the Pentagon's unidentified aerial phenomena research office noted in a report that there is a possibility that extraterrestrial life and airships may be visiting our solar system. Sejal Jakhwal Updated: Mar 14, 2023, 19:29 IST.

Pentagon UFO chief says alien mothership in our solar system possible "There is a possibility that extraterrestrial motherships and smaller probes may be visiting planets in our solar system, the head of the Pentagon's unidentified aerial phenomena research office noted in a report draft shared Tuesday.

In fact, Loeb thinks the first interstellar object spotted passing through our solar system in 2017 could have been an extraterrestrial mothership. That year, an unusual interstellar object was ...

Pentagon officials said in a draft document last week that aliens could be visiting our solar system and releasing smaller probes like missions conducted by NASA when studying other planets.. A draft research report authored by Sean Kirkpatrick, the director of the Pentagon's All-Domain Anomaly Resolution Office (AARO) and Abraham Loeb, chairman of Harvard ...

There is a possibility that extraterrestrial motherships and smaller probes may be visiting planets in our solar system, the head of the Pentagon's unidentified aerial phenomena ...

Officials from the Pentagon have laid bare the possibility of an alien mothership visiting our solar system and directing probes to Earth, much like NASA have been doing when studying other planets.

Pentagon officials wrote a report that there may be a mothership in our solar system sending these little UFOs like Independence Day and no one talking about it LMAAAwearegunnadieOOOOOOO -- We ...

Specifically, Loeb thinks the first interstellar object spotted passing through our solar system in 2017, given the name Oumuamua, could be an extraterrestrial mothership.. Loeb says it didn't ...

We mean waaaay out there in our solar system - where the forecast might not be quite what you think. Let's

A mothership in the solar system

look at the mean temperature of the Sun, and the planets in our solar system. The mean temperature is the average temperature over the surface of the rocky planets: Mercury, Venus, Earth, and Mars. Dwarf planet Pluto also has a solid ...

A Harvard scientist and a Pentagon official have authored a research article that suggests the possibility that there could be an alien mothership in our solar system, sending out probes to explore Earth and other ...

The head of the UFO office at the Pentagon and a scientist from Harvard have drafted a paper that suggests the presence of a roaming alien mothership in the solar system.

Unlike Solar system asteroids or comets, "Oumuamua appeared to have an extreme flat shape and was pushed away from the Sun without showing a cometary tail of gas and dust, raising the possibility that it was thin and artificial in origin. Three years later, Pan-STARRS discovered a definitely artificial object, namely NASA's

The report states that "with proper design, these tiny probes would reach the Earth or other solar system planets for exploration, as the parent craft passes by within a fraction of the Earth ...

The leader of the Pentagon's UFO identification office, who recently speculated about the potential for an alien "mothership" in the solar system and "extraterrestrial technological probes"...

The paper is yet to be peer reviewed. Loeb is best known for flagging an unusual Near Earth Object with the Pan-STARRS telescopes back in October 2017. The interstellar object was named "Oumuamua and "unlike Solar system asteroids or comets, "Oumuamua appeared to have an extreme flat shape and was pushed away from the Sun "without showing a cometary ...
