

Aes solar power

Who is AES Solar?

AES Solar was established in March 2008 as a joint venture between the AES Corporation (NYSE: AES) and Riverstone Holdings LLC, with committed capital of \$1 billion. The company develops, owns and operates utility-scale solar power plants that are connected to the power grid and supply homes and businesses with clean, renewable energy.

How is AES revolutionizing the future of solar?

AES is fundamentally changing the way solar is installed to make it faster, safer, scalable and cost-effective to accelerate decarbonization for businesses worldwide. That's why we're revolutionizing the future of solar through our first-of-its-kind solar installation robot, Maximo, and our innovation partnership with 5B.

Why should you choose AES Solar?

Why Now? Using cutting-edge modeling, AES Solar provides estimates for all customers, not just for what the systems will cost, but also for how much power they will generate. We can then use this data, along with your power bills, to calculate the value of your produced energy, which will tell us how much money you will save each month.

Does AES have a backlog of solar projects?

AES has a large backlog of solar projects in the US, including 3.4 GW of new projects coming online from 2022 to 2025, out of a total backlog of 10.3 GW across all geographies and technologies. In 2021, AES signed contracts for 5 GW of power purchase agreements (PPAs) for renewable energy, including 1.4 GW for US solar projects.

What is AES Solar Installation robot?

AES developed the world's first AI-enabled solar installation robot that deploys solar panels in less time and less cost. Why Maximo? Maximo is the only robot solution that provides full end-to-end automation for the mechanical installation of solar modules.

What makes AES unique?

AES is deeply rooted in local culture and customs. We invest in communities in a way that makes the best sense for them. We learn, grow, expand, and share in the experiences we have to bring innovation from one market to another, changing the future of energy, together. sustainability goals. We're making a greener, smarter future a reality.

AES on Thursday highlighted another Arizona facility, the McFarland A Solar-plus-Storage project, a 200-MW solar and 100-MW energy storage site in Yuma County. It is one of the largest solar-plus ...
