Why should you invest in AGL solar energy?

As one of the largest energy providers in Australia, AGL has everything you need to get the most out of your solar energy. Whether you already have solar panels installed on your home and want to find a great AGL solar plan, or you're interested in taking the first step to invest in AGL solar energy, AGL has a solution for everyone.

What is AGL solar?

Find out more about AGL solar, by continuing to read below. AGL Solar Savers Plan is available to residents of New South Wales, South-East Queensland, and South Australia. AGL Solar Savers offers the highest solar feed-in-tariff available through AGL, helping you earn more from your solar PV system.

Will AGL and SunDrive solar develop a commercial-scale PV manufacturing facility?

Australian energy major AGL and solar cell technology innovator and manufacturer SunDrive Solar have signed a memorandum of understanding to explore the development of a commercial-scale PV manufacturing facility in the New South Wales (NSW) Hunter region.

Does AGL still offer solar installation services?

AGL no longer provides installation services to residential customers, but the retailer still wants to attract households that have solar panels. Solar customers in Victoria, South East Queensland, New South Wales and South Australia can sign up to AGL's special deal called 'AGL Solar Savers'.

How does AGL pay for solar?

AGL customers can pay for their solar upfront, through a finance plan, via their AGL electricity bill, or using the AGL Solar Smart Plan. Businesses that want solar with AGL but can't afford the upfront installation cost can sign up to the AGL Solar Smart Plan.

Which solar battery brands are available at AGL?

Some of the listed solar battery brands available from AGL include the Tesla Powerwall and Sungrow. The retailer also offers a 'bring your own' battery deal for customers interested in joining AGL's Virtual Power Plant (VPP). You can also download the AGL Energy App which provides daily insights into your energy usage.

¹ Electrify Now is currently not available to users in the Northern Territory or Western Australia and restrictions may apply for customers with certain meter/tariff types. For the online version (not AGL app), you'll be offered an option to either calculate your estimates based on an electricity bill, or share your data using the Consumer Data Right (CDR), if we're able to access your ...

About AGL Solar. As an ASX50 listed company and Australia's largest owner of renewable energy assets. AGL's solar teams have delivered nearly 200 MW of solar systems over the last two years. AGL offers our customers an experienced in-house project design and delivery team with strong project governance and safety credentials.

Things to know about feeding electricity into the network from your solar panels. ... Our Solar Feed-in Terms apply to AGL solar feed-in tariffs. To be eligible for AGL's solar feed-in-tariff, the inverter capacity of your solar system must not exceed, or must be export limited to, 10kW.

With most solar system capacity now being installed, it's hard to imagine you are not producing more than you are using in any daytime situation . . . unless using high power hungry appliances, and / or it's very clouded over, rainy etc, or the panels are very badly shaded.

You can monitor your solar system's performance, how much solar your system is exporting to the grid, check your billing data and identify potential issues through a "solar status" health check. You will be able to see this data on the AGL app once your meter has been reconfigured. To learn more about using the AGL app visit the AGL app page.

This plan comes with access to AGL Rewards and those with solar panels will receive a feed-in tariff of 3.3c/kWh - the minimum rate for single rate tariffs in Victoria. Here is the AGL plan on our database for Victoria. This is a product from a referral partner+. These costs are based on the Citipower network in Melbourne but prices may ...
