

Allianz renewable energy partners

Allianz Group is adapting its guidelines to pragmatically provide insurance and investment in renewable energy projects. The changes aim to support and speed up the transition of energy companies, particularly in Asia and Eastern Europe, where the adaptation from coal to renewables is difficult and less advanced than in Europe or the United States.

“Bank of America Merrill Lynch is pleased to partner with both Allianz Capital Partners, in its first U.S. wind power tax equity investment, and with EDF Renewable Energy on this important wind power development in New Mexico,” said Todd Karas, head of Renewable Energy Finance at BofA Merrill Lynch.

NeuConnect is an interconnector, a structure that enables electricity to flow between two separate power grids, and it is a remarkable project in many ways. It involves running undersea cables between Germany and the United Kingdom to create an invisible energy highway that, for the first time, provides a direct power link between two of Europe's largest ...

As an investor, Allianz plans to support the ramping up of renewable energy by investing an additional 20 billion euros in climate and cleantech solutions in line with the EU sustainability regulation.

Solara will be the largest solar project in Portugal. With its capacity of 218.8 MW Solara can provide renewable energy for approximately 100,000 average households of the region per ...

Allianz Capital Partners (ACP) has further expanded its renewable energy investments both in volume and geographically. By signing an acquisition agreement with the wind power company OX2 for six turbines, ACP has successfully entered the Finnish market and further diversified its portfolio.

energy requirements of an extra four billion people must be met solely by renewable energy generation. The good news is that through the startling improvements in the efficiency of renewable energy systems, I have little doubt that by 2040, there will be plentiful supplies of clean energy from wholly renewable sources. Allianz Partners 2019

Most renewable energy investment flows will go to solar photovoltaic and wind in the key markets of China, Europe, and the US. However, there needs to be greater allocation to developing markets - Africa accounted for a mere 1% of new renewable energy capacity installations globally last year. The private sector has a major role to play.

With this investment, Allianz's commitment to the European renewable energy sector exceeds 2.5 billion euros in 54 wind farms and 7 solar parks. ACP's wind and solar portfolio generates sufficient renewable energy to supply over 800,000 households which is comparable to a city the size of Barcelona.
