

Aquatherm solar panels

What is Aquatherm Industries?

Aquatherm Industries is an ISO 9001:2008 registered company and has grown to become the most trusted name in the solar pool heating industry. They process all materials, from pellets to pallets, under one roof in their 50,000 square foot facility in Lakewood, NJ.

Is ecosun a good solar pool heater?

When used in conjunction with our stainless steel mounting system, Ecosun combines the strength and high performance of a solid collector with the benefits of roof ventilation and reduced wind load. As tested and certified by the Florida Solar Energy Center (FSEC), Ecosun is the highest rated vented solar pool heater in the world.

Is solar pool heating considered a luxury?

Over 35 years ago, a small group of entrepreneurs had a vision that heating a pool with a conventional fossil-fuel heater would become a luxury we can no longer afford. They immediately began work on what would become the Solar Industries Solar Pool Heating System.

Is solar a good option for pool heating?

Solar is the most cost-effective form of pool heating, with no additional operating costs, low maintenance and an endless supply of free heat from the sun. Solar can act as a standalone heater or in conjunction with an existing heater as a hybrid heating system.

Can a solar pool heater be used as a heater?

Solar can act as a standalone heater or in conjunction with an existing heater as a hybrid heating system. This Virginia Beach hotel keeps customers swimming all year with a solar-heated indoor pool.

What makes solar industries different from Aquatherm industries?

Aquatherm Industries manufactures Solar Industries, a flagship brand, ensuring total quality control and the highest performance and quality of collectors and components. Solar Industries has been in constant production since 1977.

Aquatherm solar panels

The ECOSUN Solar Pool Heater was designed to have the wind-load and moisture-relief benefits of an individual tube pool solar panel, and the water heating properties of a tube-on-tube design.

In an automatic system, make sure there is power to the control - usually there is an indicator or "power on" light. It is possible the auto-control is not functioning properly - check this by over-riding the "auto" mode and placing the selector switch into the "on" or "solar" position.

Inside the header, a permanently embedded "stem-block" gives the panel precise, direct-metered flow, resulting in maximum heat transfer (even when using a variable-speed pump). This same patented technology is shared in two of Aquatherm's other products, "Sunlite" and "Ecolite," which hit a milestone last year as the manufacturer ...
