

Automatic power meter reading system using gsm network pdf

Documentation - Free download as Word Doc (.doc), PDF File (.pdf), Text File (.txt) or read online for free. The document describes an automatic power meter reading system using GSM networks. It consists of GSM power meters installed at customer locations that can send meter readings via SMS to an energy provider's SMS gateway upon request. The provider's application software ...

Implementation of Automatic Meter Reading System Using Wireless Sensor Network Our study Survey: traditional meter reading such as errors in reading, inaccuracy, external conditions affecting readings, delayed work we have implemented meter reading system based on latest technology. 2.2. Zig Bee Based Electric Meter Reading System

automatic power meter reading (GAPMRR) system is presented in this paper. This system consists of GSM digital power meter installed in every consumer unit. A GSM modem is connected to the energy meter. Each modem will be having its own sim. The sim card used is implemented in energy meter and it sends a message to the user about the due bill. A ...

P. RakeshMalhotra, Dr.R.Seethalakshmi "Automatic Meter Reading and Theft Control System by Using GSM P".RakeshMalhotra et al. / International Journal of Engineering and Technology (IJET). [12] H. Tan, H. Lee., and V. Mok, ...

The technology of E-metering (Electronic Metering) has gone through rapid technological advancements and there is increased demand for a reliable and efficient Automatic Meter Reading (AMR) system. the design of a simple low cost wireless GSM energy meter and its associated web interface, for automating billing and managing the collected data globally.

The GSM digital power meter (GPM) is a single phase IEC61036 standard compliance digital kWh power meter with embedded GSM modem which utilize the GSM network to send its power usage reading using ...

The design of a simple low cost wireless GSM energy meter and its associated web interface is presented, for automating billing and managing the collected data globally. The technology of e-metering (Electronic Metering) has gone through rapid technological advancements and there is increased demand for a reliable and efficient Automatic Meter ...

An Automatic Electric Meter reading system can be introduced with every energy meter in an area, an effective means of data collection that allow substantial saving through the reduction of meter re-read, greater data accuracy, frequent reading, improved billing and customer service, more energy profiles and consumption trends updates and better ...

Automatic power meter reading system using gsm network pdf

P. RakeshMalhotra, Dr.R.Seethalakshmi "Automatic Meter Reading and Theft Control System by Using GSM P".RakeshMalhotra et al. / International Journal of Engineering and Technology (IJET). [12] H. Tan, H. Lee,, and V. Mok, "Automatic power meter reading system using GSM network," in IEEE International Power Eng. Conf., Dec. 2007. [13] J.

Automation ranges from Connecting to a meter through an RS-232 interface for transmitting the meter measurements all the way from the meter to the utility company via GSM network. 1.1 History of Meters With the development of country's economy and the improvement of national power, the power requirement is still ever increasing due to use of ...

GSM Automatic Power Meter Reading (GAPMR) system is consists of GSM Digital Power Meters installed in every consumer unit and an electricity eBilling system at the energy provider side. Raditional Meter Reading and billing is done by human operator Irom houses to houses and building to building. This requires huge number oI labor operators and long working hour to ...

The GSM based automatic meter reading system is more efficient & reliable than other system. In this system automatic billing & notification through the use of GSM network (3). ANTISMUGGLING SYSTEM FOR TREES IN FOREST USING ADXL SENSOR AND ZIGBEE MODULE In that units three controllers, Zigbee modules and MAX232 are used.

Our project's goal is to build and install an automatic energy meter reading system that measures and transmits total energy consumption to the Electricity Provider via the GSM network, as ...

AUTOMATIC POWER METER READING SYSTEMUSING GSM NETWORK Dr.M.Aravind kumar Professor, Department of ECE, West Godavari Institute of Science and ... S. Arun "Design and Implementation of Automatic Meter Reading System Using GSM, ZIGBEE via GPRS" is the title of the project. This paper outlines an approach for implementing

International Workshop on Intelligent Systems and Applications, 2009. [4] H.G.RodneyTan,C.H. Lee,V.H.Mok,"Automatic power meter readingthe system using GSM network", The 8 Conference (IPEC 2007) ternational Power Engineering

International Journal of Scientific Research in Science and Technology, 2020. Automated Meter reading systems are an invaluable technological advancement that can lead to a better standard of living, owing to the fact that metering has become a part and parcel of our mundane lives.

Bharat Kulkarni "GSM Based Automatic Meter Reading System Using ARM Controller"; International Journal of Emerging Technology and Advanced Engineering Website: Volume 2, Issue 5, May 2012. The 8051 ...

Automatic power meter reading system using gsm network pdf

Figure 6: GSM Module Automatic Meter Reading System Using Wireless Sensor Network and GSM 109
RESULTS & DISCUSSIONS Recent progresses in integrated circuits manufacturing technology in small sizes and expansion of ...

International Workshop on Intelligent Systems and Applications, 2009. [4] H.G.RodneyTan,C.H. Lee,V.H.Mok,"Automatic power meter readingthe system using GSM network", The 8 Conference (IPEC 2007) ernational Power ...

Thus this technology can be proved to be effective in meter reading systems. In This way meter reading system can be made automatic and this will also eliminate shortcomings of traditional meter reading system. The costs involved in manual reading of the meter are eliminated and the consumption of goods becomes more transparent.

The main purpose of this project is presenting a design of a simple, low cost wireless GSM energy meter and its associated web interface, for automating billing and managing the electricity disconnection, if consumer not paying bill in allotted time. : The technology of "Electronic Metering" has been advancing rapidly and there is increased demand for a reliable and efficient ...

GSM network but GSM network is best among this technology. So this paper will discuss only GSM based AMR system. Automatic meter reading system helps the customer and energy service provider to access the accurate and updated data from the energy meter.AMR System can send energy consumption in hourly, monthly or on request.

The "Automatic Power Meter Reading System using GSM Network" is developed by Tan et.al, which consists of GSM digital power meters installed in every consumer unit and an electricity e-billing ...

Most of the time they have complains regarding statistical errors in their monthly bills. The objective of our project is to design and implement an automatic energy meter reading system that measures and transmits total energy consumption to the Electricity Provider using the GSM network as well as disconnect or reconnect the meter remotely.
