

Avaya uninterruptible power systems ups

What is the Avaya 9135 uninterruptible power system?

The Avaya® 9135 uninterruptible power system (UPS) protects your sensitive electronic equipment from the most common power problems including power failures, power sags, power surges, brownouts, line noise, high voltage spikes, frequency variations, switching transients, and harmonic distortion.

What does Powerware LanSafe do for Avaya 9130 ups?

It also gives you a complete record of critical power events, and it notifies you of important UPS or power information. If there is a power outage and the Avaya 9130 UPS battery power becomes low, Powerware LanSafe software can automatically shut down your computer system to protect your data before the UPS shutdown occurs.

How do I configure the Avaya 9130 ups & modem handling features?

To configure the UPS and modem handling features for remote monitoring and service, contact your Avaya service representative. Each Avaya 9130 UPS ships with Powerware LanSafe Power Management Software. To begin installing Powerware LanSafe software, see the instructions accompanying the Software Suite CD.

Can I install the ups & EBM in a hermetically closed environment?

DO NOT install the UPS or EBM in a hermetically-closed environment without any exchange of air. The UPS and EBM are heavy (see page 61): 1) Avaya strongly recommends to remove the battery tray from the UPS before lifting. 2) A minimum of two people are required to lift the cabinets into the rack.

How do I shunt a 9135 ups breaker?

Connect this RPO switch to a device that trips all breaker(s) located upstream(1) and downstream(2) the Avaya 9135 UPS. This can be achieved by means of a shunt trip: (1) If not, the output devices could be powered again through static switch when the two-position switch is released.

Is Avaya a trademark?

Avaya and the Avaya logo are trademarks of Avaya Inc. and may be registered in certain jurisdictions. Powerware, ABM, and LanSafe are registered trademarks and ConnectUPS is a trademark of Eaton Corporation or its subsidiaries and affiliates.

NOTE Do not connect more than ten EBCs to the UPS. EBC System Discharge Time (2000 VA and Below UPS) The following table displays the approximate discharge times, shown as a function of time versus load in VA. In addition to the number of EBCs required, a UPS with internal batteries is required for the times shown in the table. Load
