Do you need a battery backup?

One important part of your plan should be considering battery backups--also known as an uninterruptible power supply, or UPS--which will automatically take over when the power drops or goes out entirely. But no one solution's perfect for everyone.

What is an uninterruptible power supply (UPS)?

However, typical desktop computers, routers, and similar devices still need to be plugged into a power source all the time to work. That's where an uninterruptible power supply (UPS) comes in. Its main function is to act as a big battery that powers your devices when your electricity goes out.

Why do I need a battery-backed ups?

Batteries enable a UPS to power your devices once the grid fails. That's why it's essential to choose a UPS with enough battery-backed outlets to support the devices you want to keep online. More advanced UPS models typically offer more outlets (and more that are battery-backed).
