Even if you're not prone to power outages, many UPS models also include surge protection features. An automatic voltage regulator smoothes over brownouts and spikes without needing to change your battery. It's one of several capabilities you'll want to look for in the best battery backups. The best battery backups: Reviews & Recommendations

An uninterruptable power supply consists of two essential components: a power strip and a backup battery. The power strip supplies normal AC power to your devices, while the battery steps in as needed. In the event of a blackout, this will buy you enough time to properly shut down your servers. Of course, a good UPS should include more than the ...

A reliable battery backup protects your electronics in more ways than one. We may earn revenue from the products available on this page and participate in affiliate programs. Learn more > Losing power is never fun, but it can also seriously mess with your electronics, especially if you don't have a battery backup.

so it would go, Outlet->Surge protected power strip->UPS->devices that I want to have on battery backup. I would also have devices plugged into the power strip too, that don't need battery backup, like TV, game consoles etc. The devices being plugged into the UPS would be just my server to give me time to shut it down safely in the event of a ...
