A lithium-ion battery is a type of rechargeable battery. It has four key parts: 1 The cathode (the positive side), typically a combination of nickel, manganese, and cobalt oxides; 2 The anode (the negative side), commonly made out of graphite, the same material found in many pencils; 3 A separator that prevents contact between the anode and cathode; 4 A chemical solution known ...

Disposable AA batteries may seem a little outdated now that rechargeable AAs exist, but in many cases, they are still the most cost-effective and sometimes even the most eco-friendly solution. Modern disposable alkaline batteries are quite mild compared to other battery types when it comes to toxicity and you can (and should) recycle them.

Disposable AA batteries may seem a little outdated now that rechargeable AAs exist, but in many cases, they are still the most cost-effective and sometimes even the most eco-friendly solution. Modern disposable alkaline batteries are ...
