

# Battery backup power strip for 24 hours

If you keep your computer equipment plugged into an inexpensive commercial battery backup device instead of a power strip, you can simply unplug that battery backup from the outlet and plug it into the inverter on your home-brew battery backup when the power goes out. That way your devices won't shut down at all due to the outage.

Compact UPS: Mini battery backup ensures the continuity of device power during power goes off. good for routers, modems, security cameras, LED light strips. keep the power and internet always online. order it, you will receive 1x 10400mAh mini UPS, 9x DC connectors, 1x US AC adapter, and 12 months of customer service.

In order to protect your computer against power supply interruptions, you need a battery backup. UPS units are like power strips that contain a big battery inside, providing a buffer against power supply interruptions. This buffer can range from a few minutes to an hour or more depending on the size of the unit.
