

Best computer battery backup

What makes a good UPS battery backup?

Even if you're not prone to power outages, many UPS models also include surge protection features. An automatic voltage regulator smoothes over brownouts and spikes without needing to change your battery. It's one of several capabilities you'll want to look for in the best battery backups.

Are UPS battery backups reliable?

We've chosen some robust and ultra-reliable UPS battery backups from some of the most respected brands in the industry. These systems offer robust battery backup for all your devices, fast-charge ports for portable devices, and advanced surge protection, among other great features.

Which APC battery backup is best?

The APC BR1500G is an excellent battery backup with AVR and surge protection. It allows for easy cell replacement and the ability to add external backups. If you need a UPS and don't want to spend a lot, the APC UPS BE425M Battery Backup is for you.

Do you need a battery backup?

One important part of your plan should be considering battery backups--also known as an uninterruptible power supply, or UPS--which will automatically take over when the power drops or goes out entirely. But no one solution's perfect for everyone.

How much power do you need for a battery backup?

However, you'll need to make sure that your supply has enough output power for the job. In general, the best battery backups can output at least 400W. UPS models include several different features, but you'll want to focus on a couple, depending on what you want to back up.

Why do I need a battery-backed ups?

Batteries enable a UPS to power your devices once the grid fails. That's why it's essential to choose a UPS with enough battery-backed outlets to support the devices you want to keep online. More advanced UPS models typically offer more outlets (and more that are battery-backed).
