Where did this pack come from? I guess there's a technic pack named "The 1.12 pack"; but since 1.12.2 is a Minecraft version that many packs run on and technic packs aren't well known, nobody will know what you mean unless you call it "The 1.12.2 pack from technic";

Energy Converters (just allow conversion of energy between EU and RF. The rates can be configured and it can even be lossy as to prevent infinite cycles) Ofc these mods all also have certain compatability mods attached to them. For my own server I did disable a bunch of "op features". At least in my opinion.

I think the ultimate endgame power generation option in Direwolf20 is probably the Draconic Evolution reactor. Once you have a decent power base to work from, you may be able to use ...

About this mod. The 1.12.2 Pack offers a unique collection of mods that other packs failed to bring - and in the best possible way. Your world is your own - exploring dimensions, performing magic, or building automated tech systems are all possibilities!

Pick a mod in the pack. Any mod. Learn that mod and progress through it. Then repeat for a new mod. After a while you'll learn how to combine them and automate them. And while I vowed last night to never do the Tinkers/Thermal start ever again because I'm sick of both of them, they are still both great entry level mods for those new to FTB.

[Direwolf20 1.12.2 modified] What's the best set of armor in the pack that's not draconic evolution? Some friends and I are starting a new server, and as a group we decided to remove draconic evolution and BrandonCore, and adding Ender IO Endergy, and a few other mods.

The standard energy system that most (but not all) tech mods use is the Forge Energy API. Any mod that uses the "FE" label is clearly indicating they are using Forge Energy. Unless they are horrendously out-of-date, any mod using the "RF" label is saying "Forge Energy is a boring name and it's a derivative of the previously standard CoFH RF API ...

I prefer 1.12.2. But sometimes it has too much duplicated functionality with mods doing basically the same thing: refined storage and AE, lots of ore pulverizerscrushers from different mods, lots of pipeswiresconduits to choose from. As for me its annoying to choose which pipeconduitlight source will cause less lag or chunkloading issues.

You can offer better mods if you know. For h-end energy, I chose NuclearCraft 2 because I think its more interesting than Extreme Reactors, and NC2 is fresh after an update. About magazine and storage, I chose Refined Storage than Applied Energistics. Thanks for any help. I will add screens what mods I actually have in my mod pack.

And then if possible, connect crafting stations and the like to said storage, all while remaining wireless. I'm on direwolf20 1.20 and I've tried a number of mods as well as combinations, currently I'm using Occultism for the wireless wormholes and storage, and Ars nouveau storage lecterns thats inked up to a bunch of Diamond Sophisticated storages.
