

Best power generators for home

What type of generator is best for a home?

Air-cooled generators are the typical choice for backup residential power. This type of generator offers simple maintenance and affordability. The Generac Guardian 24kW is one of the largest air-cooled generators available, providing up to 24,000 watts of power when connected to a propane fuel supply.

What is the best portable generator?

Accordingly, you want a smaller generator that can easily move into place. The Honda EU2200i Companion was our pick for the best portable generator, which maintains that status here. While its modest 1,800W output is only intended for small- to medium-sized power tasks, it really shines in terms of its great all-around design.

Can a generator power a whole house?

Large whole-house generators can power an entire average home, while smaller units provide power for key appliances. These are the best standby models from CR's tests.

Which Generac home generator should I buy?

If you're looking for a well-equipped generator for your most commonly used appliances and conveniences, the Generac Guardian 24kW Home Generator is a great option. It offers the most power of all residential air-cooled generators and can be remotely monitored using Generac's Mobile Link Monitoring System.

What should I consider when buying a generator?

You have four options to consider when buying a generator. Home standby generators are installed permanently on your property, can run on natural gas or propane, and kick on automatically during an outage. Portable and inverter generators can be moved around.

How do I choose a home generator?

When shopping for a home generator, there are two types to choose from. The first option is a portable generator. Portable generators are easy to find in your local hardware store, run on gasoline, and have to be moved outside and manually started during a power outage.
