

# Best tips to buy solar power system

How do I Go Solar for my home?

The most common way to go solar for homeowners is the installation of panels on their roofs. These systems can be purchased directly through an installer (or assembled for the DIYers) as a large cash purchase or through relatively affordable financing (such as a 1.99% APR 15-year loan).

Should you buy a home with solar panels?

Help with your home value: If you plan to sell your home down the line, having home solar panels can be a major perk to buyers and can help increase your home's value. Key step toward going green: Since solar is a renewable resource, you can shrink your carbon footprint.

How can I save money on solar energy?

The most powerful savings tool for homeowners who buy their solar systems is the federal solar tax credit, available for installations through 2033. It allows you to subtract 30 percent of the cost of buying and installing solar heating, electricity generation, and other solar home products from your federal taxes.

Should I buy or lease solar panels?

If you have the funds, it's better to buy solar panels rather than lease, and that's mostly due to tax credits. The federal government will provide a 30% tax credit for the total cost of the project. This will take a huge chunk off the bill. The sooner solar panels are paid off, the sooner they provide "free" energy.

Are residential solar panels a good option?

Throughout the country, residential solar panels have become an increasingly popular option for generating energy for homes. The rising costs of energy across the US, along with falling prices for solar panels, and excellent federal tax incentives, have made solar power a much more attainable and economically beneficial option for homeowners.

What are the best solar panels for homes?

Panasonic Solaris our top pick for the best solar panels for homes. Instead of focusing on one or a few products that could work for any situation, the company continues to develop a wide selection of high-quality and versatile product lines to ensure consumers can install the solar panels and products best suited to their homes and needs.
