TOPEKA, Kan. (AP) -- Efforts to propel Kansas' renewable energy future are at a standstill, mired in legislative stalemate. At its center is a former TV weather personality who is ...

Before the rebranding as Meta, Facebook was ranked as the fifth-largest corporate purchaser of renewable energy in 2020 behind Amazon, Google, Verizon, and McDonald's. 100% renewable energy vs. 24/7 clean ...

This is a list of U.S. states by total electricity generation, percent of generation that is renewable, total renewable generation, percent of total domestic renewable generation, [1] and carbon intensity in 2022. [2]The largest renewable electricity ...

Data from the American Clean Power Association indicates Kansas has the second-highest share of electricity generation from renewable energy at 44%. Boost Kansas said communities in the Sunflower ...

Wind and Solar Energy Program. The Kansas State University ECE Department is currently working on wind and solar energy projects. This work is supported by The National Science Foundation and the U.S. Department of Energy We plan to report several parameters of our systems, including: streaming video feed; light intensity vs. time via LUX meter

Kansas wind resources. In the U.S. State of Kansas, wind power is the largest source of electricity, generating over 41% of the state's electricity in 2019. [1] Kansas has a high potential capacity for wind power, second behind Texas. The most recent estimates (2012) are that Kansas has a potential for 952 GW of wind power capacity yet had only about 5.6 GW installed by ...

The Kansas Energy Office, a division of the Kansas Corporation Commission, administers programs and connects Kansans to objective information about conservation, efficiency, and alternative energy. Funding is provided by the federal State Energy Program. (785) 271-3184.

Coal - Coal-fired plants generate the majority of our electricity. Part of our energy plan is focused on the stability of cleaner coal generation. One result is Iatan 2, a zero-liquid discharge facility that is one of the cleanest coal-fired power plants in the United States. The La Cygne Generating Station has also undergone significant environmental improvements to meet federal and state ...

On its path to open a facility designed to turn agriculture residue into a scalable biofuel business, SAFFiRE Renewables plans to break ground on its pilot plant near Liberal, Kansas, in late 2024. In 2023, the company negotiated a license agreement for the National Renewable Energy Laboratory's (NREL) deacetylation and mechanical refining (DMR) ...
