Paraffin wax (PW) is an energy storage phase change material (PCM) with high energy storage capacity and low cost. However, the feasibility of its application in solar thermal storage has been limited by leakiness during solid-liquid phase conversion, low thermal conductivity, single heat capture mode and low energy conversion rate.

Since 2019 we have been using our expertise to help Barbados to transition to 100% renewable energy before 2030 - which we fully believe can happen well in advance of this date. We focus our development and investment activities on Wind, Solar PV and Battery Energy Storage Systems to meet this transition target.
