Burning man solar power

I built a solar power system for BRC 2019 with the goals of powering air conditioning and microwave bacon (e.g. 400~450W continuous vs. 1300~1600W short peaks). My system used a Victron charge controller, inexpensive ...

Hole saw for your power drill. 12 Volt Battery. Swamp cooler can be wired to a single battery or you can make your own Solar Power Station, see The PlayaLab's other tutorials! 1) Bucket Prep. Start with your 5 gallon bucket. Use a power drill and hole saw to cut large holes in the upper 1/3 of the bucket. You can do 1 or 2 rows of holes:

To add to that, to quote from Brad Templeton, If you are using solar, to be green you must put the panels back into an always-used grid-tie solar installation when done, and probably took them from there. Do not buy solar just for camping unless you want to crap on the planet. Also, lead-acid batteries, which are the cheapest per kWh, require periodic maintenance to keep their ...

The nonprofit Burning Man Project collaborates with the community to build Black Rock City, and works year-round to nurture the global Burning Man movement. We can't do any of this without YOU. Please consider making a tax-deductible donation in support of our work building a more creative, connected, and resilient world.

^^ This. Thank you. I spent days doing wattage calculations, cost assessments, researching batteries, and panels, finding the lowest wattage fans, lights, etc. to stay within the max "potential" power rating of a DIY solar setup, and finally asked myself, why not just get a tried and true Honda EU2200i generator?

We're planning to use mid-sized solar systems to make "solar-powered Man" a reality. The Black Rock Power team, under Starchild, has designed a custom solar generator and will begin construction on the 360 ...
