Is Canadian Solar a Chinese company?

It said it also wants to invest in a new research institute in Jiaxing, Zhejiang province. Canadian Solar is the only major Chinese PV company without a listing on a Chinese stock market. JinkoSolar, JA Solar, and Trina Solar have already moved from the New York Stock Exchange to the SSE.

Who is Canadian Solar?

Over the past 23 years, Canadian Solar has successfully delivered over 125 GW of premium quality, solar photovoltaic modules to customers. Since entering the project development business in 2010, Canadian Solar has developed, built, and connected over 10 GWp of solar power projects and 3.3 GWh of battery energy storage projects across the world.

Where is Canadian Solar made?

When Canadian Solar was founded in 2001, it made all its solar products in China. By early 2023, the company had factories in four countries: China, Thailand, Vietnam, and Canada. (Qu says it used to manufacture in Brazil and Taiwan too, but later scaled back production in response to contracting local demand.)

Is Canadian Solar a bankable company?

Canadian Solar is one of the most bankable companies in the solar and renewable energy industry, having been publicly listed on the NASDAQ since 2006. Over the past 23 years, Canadian Solar has successfully delivered over 125 GW of premium quality, solar photovoltaic modules to customers.

When did Canadian Solar go public?

With the company's acquisition of Recurrent Energy, Canadian Solar's total project pipeline reached 20.4 GW, including an increase in the late-stage project pipeline to 2.4 GW. In November 2006, the company went public (Nasdaq: CSIQ) at \$15 per share.

Why did Canadian Solar move to China?

Labor costs and the availability of labor forces are "the number one reason" for that move, Qu says. When Canadian Solar was founded in 2001, it made all its solar products in China. By early 2023, the company had factories in four countries: China, Thailand, Vietnam, and Canada.
