Who is Canadian Solar?

Over the past 23 years, Canadian Solar has successfully delivered over 125 GW of premium quality, solar photovoltaic modules to customers. Since entering the project development business in 2010, Canadian Solar has developed, built, and connected over 10 GWp of solar power projects and 3.3 GWh of battery energy storage projects across the world.

Who makes solar panels in Canada?

Canadian and American solar panel part manufacturers include Canadian Solar, Solaria, Silfab Solar, Tesla, GAF Energy, Crossroads Solar, and Next Energy Alliance, among others. East Asia has been manufacturing solar panel components for decades, but so have some of these companies listed above.

What is the largest solar project in Western Canada?

Once completed, the Barlow (near Barlow Trail and 114 Avenue SE) and Deerfoot (114 Avenue and 52 Street SE) solar projects will be the largest solar installation in a major urban centre in Western Canada with a combined capacity of 64-MWs. Together, they will cover the equivalent of roughly 170 (Canadian) football fields.

How many solar projects are there in Canada?

Today, Canada is home to 196 major solar energy projects, the largest of which are found in Alberta and Ontario. Additionally, more than 43,000 solar (PV) energy installations are found on residential, commercial and industrial rooftops across the country, providing power directly to those homes and businesses.

Does Canadian Solar have a battery storage contract?

Canadian Solar did not provide financial details of the contract. The company's shares were up nearly 1.5% in early trading. Battery storage, used to back up intermittent renewable power supply to stabilize the grid, is an evolving technology, and there are very few large-scale operational projects in the world.
