Generac® Power Systems, Inc. INTRODUCTION Thank you for purchasing this model of the Centurion product line by Generac Power Systems Inc. This model is a compact, high performance, air-cooled, engine-driven generator designed to automat-ically supply electrical power to operate critical loads during a utility power failure.

A portable generator may not start if appliances are plugged in when starting the generator. Allow the generator to warm up and ensure the choke is in the RUN (or OPEN) position with no load applied. Once up and running, a generator can be tested using a known-working appliance. Check the generator's breakers to see if any have been tripped and reset if necessary.

The 5000 Watt Centurion Generator has a maximum power output of 5000 watts and a running wattage of 4500 watts. This makes it suitable for powering essential household appliances such as refrigerators, sump pumps, ...

Generac's Independent Authorized Service Dealer network allows customers to contact local technicians who have been trained and certified to perform work and initiate warranty claims for Generac's products.
