

Cheap photovoltaic panels

Which solar panels should I buy?

Ideally, you want to use the highest efficiency panels you can afford. According to the National Renewable Energy Laboratory (NREL), most solar panels have efficiency ratings between 16% and 22%. The top-quality, high-efficiency panels cost the most. If you need cheap solar panels, look for high-quality panels that fall within the 17% to 19% range.

Should you buy solar panels with the cheapest price tag?

The solar panel with the cheapest price tag may not be the most cost-effective option in the long term. Consider efficiency, performance, and warranties when comparing your options. Your payback period may be longer if you shop for solar panels with the lowest price tag.

What are photovoltaic panels made of?

Most photovoltaic (PV) panels are made of monocrystalline or polycrystalline semiconductor materials, which are named for the number of silicon wafers used to create the solar cells: "mono" for one, "poly" for many. Polycrystalline panels are generally cheaper than monocrystalline solar panels but are also usually less efficient.

Lower efficiency: Cheap solar panels are more likely to be less efficient, usually around 18-21% efficient rather than 20-23% efficient. Affordability hurdle: The upfront cost of solar panels, even cheap ones, is still a significant investment that may only be affordable for some homeowners. Short lifespan: Cheap solar panels may degrade faster than premium panels ...

Average Cost by Solar System Size. Depending on which state you live in, your average 6kW solar panel system will cost between to install after accounting for the 30% solar tax credit. However,...

If you're looking to buy cheap solar panels, we recommend looking at options from Q Cells and LONGi, in particular. These are both tier-one panel manufacturers that offer low prices, solid warranty coverage and above-average efficiency ratings for their products.
