They raised the full-year estimate for China solar installation by 21%. Chinese solar stocks have gained in recent weeks, helped by improving industry fundamentals, with Xinyi Solar's robust earnings giving the sector a boost. The stock rose for an eighth day Monday, its longest streak since 2018.

Are Europe and China winning a battle over the solar industry?

Europe and China's battle over the solar industry has been going on for two decades. Chinese solar-panel makers are winning with an unassailable lead: they now account for 80 per cent of global production capacity. But the cost of that victory is now looking too high. China dominates the solar panel sector's entire supply chain.

Why do Chinese companies build solar panels?

Chinese makers are able to build over 860 gigawatts of solar modules annually. The biggest advantage Chinese companies have is scale. Due to the sheer size of the domestic market -- which added a record 217 gigawatts of solar last year -- companies invested heavily in larger scale manufacturing and automation. That is paying off today.
