Source of prices are maximum MV production and current prices which are in game. I've remove hydro power plant which could be best because I tried ...

Solar power plant; Nuclear power plant; Which electricity development nodes in Cities Skylines 2 are best for you, depends on what you want: a whole lot of energy for relatively little money, or ...

I've reloaded CS2 after many months and in the 40,000 inhabitant city that I've built, for some reason garbage is not being collected at the waste water treatment plant or the coal power plan. No problem anywhere else, just at those two facilities. I've deleted and rebuilt them. I've checked to make sure the roads where property connect, everythings good there.

The best power plants in Cities Skylines Overview table. Construction cost and upkeep: Costs per MWh. Further reading ... Skip the Oil Power and wait until you unlock the Solar Power plant at 20.000 citizens. If you are going to experiment with the Hydro dam then I strongly recommend to save your game!

The best power plants in Cities Skylines Overview table. Construction cost and upkeep: Costs per MWh. Further reading ... Skip the Oil Power and wait until you unlock the Solar Power plant at 20.000 citizens. If ...

Solar power went through several iterations in this game. In the beginning, solar power plants constantly produced power, and the custom asset you use may still reflect that state. After AD, solar power worked only during the day and not during the night.

A community-led subreddit for Cities: Skylines and Cities: Skylines II, the city-builder games from Colossal Order. ... First thing i did before placing the hydroelectric power plant was re-direct the river, fairly far down-stream from the water source (this is vital). I let the water pool up -- you can imagine just a wall of terrain where the ...

I had this issue yesterday. I had two coal power plants, and both stopped working due to too much garbage. I realized how much they were costing and built a solar power plant and bulldozed the coal plants. This gave me a huge surplus of power and a ...

Cities skylines solar power plant

The solar power plants are connected to a grid with multiple different power plants. What you can do in the game is to have solar power plants operate during daytime, to handle the peak usage, and have other power plants that supply night ...

I suggest connecting the power plant to the outside connection, that way it will most definitely be pushing all that excess power to neighboring cities and you'll get free money from it. In either case, it doesn't look like your city is lacking for power in your current (no pun intended) set up.

Fun fact, based on MIT papers I found the other day: 240 MW Solar updraft tower that you can see here, in real world would be over 1 km tall with the diameter of 120+ meters. The collector (greenhouse at the base of the tower) would be 7 ...

Just have enough "normal" powerplants to get you a full power coverage at 100% during the night ... and then buy a few solar powerplants for the day, so that you can reduce your power ...

Cities: Skylines II. All Discussions Screenshots Artwork Broadcasts Videos News Guides Reviews ... My solar power plant keeps saying that the sewage is backed up. I have enough sewage capacity, it's connected because it is getting water fine and it still says it's getting backed up. Is this a bug?

Build solar plant. Dropped garbage budget to 50%. Solar power plant electricity created revenue. Brought budget for garbage to 100%. Expected Result Garbage would be removed from solar power plant. Actual Result Solar ...

The tower contains the boiler. Unlike with a massive photovoltaic array which just converts sunlight into electricity, this kind of solar plant uses an array of tracking mirrors that rotate according to the position of the sun in the sky and each individual mirror reflects the sunlight at a single point, which, as you'd imagine, gets rather hot.

There is something beautiful and cool about seeing this giant fields of solar panels. Not to mention there is a trade off, solar is renewable clean power, but it takes up a lot of space. Haven't seen ...

I wish the power options in this game were a bit more interesting. Hydro being cheap per MW (with high upfront cost) is fine. But, assuming you can't build a good hydro plant (and disregarding the end game fusion plant which is a real ...
