The fact that most companies rely on commercial power grids also means they are more prone to electricity rate increases. Going solar is the most practical way to save money on your energy ...

When to switch electric companies. In a deregulated market, you can switch electric companies anytime. Some customers switch electricity providers because their new location is outside their current retail electricity provider's (REP) service area. But there are other reasons to change electricity providers in Texas, from nabbing lower rates to prioritizing green energy.

The rising commercial utility rates compound this challenge. A commercial solar installation can help mitigate
