

Commercial solar power plant subsidy

What are Commercial Solar Tax Credits?

Commercial Solar Tax Credits, also known as the Investment Tax Credit (ITC), have been in place since 2006. Initially set at 30%, the ITC offers businesses a significant tax reduction of up to 22% as of now. The scheme has been gradually winding down to encourage businesses to adopt solar power earlier.

Can I get a tax credit for solar energy?

There are two tax credits available for businesses and other entities like nonprofits and local and tribal governments that purchase solar energy systems (see the Homeowner's Guide to the Federal Tax Credit for Solar Photovoltaics for information for individuals):

Can solar energy equipment be depreciated?

The IRS allows solar energy equipment to be depreciated over a five-year schedule. To claim the Investment Tax Credit (ITC), businesses need to commence construction before the deadline. There are several important rules and features for businesses to pay close attention to while preparing to claim these tax credits.

What is the ITC tax credit for solar panels?

Laid out in Section 48 of the U.S. tax code, the ITC for businesses provides an incentive for investing in clean energy -- one of the key incentives is a dollar-for-dollar tax credit based on the cost of your solar panel system. Through the Inflation Reduction Act of 2022, the ITC was set to 30% of the cost of the system, and extended until 2034.

How much tax credit can a solar PV system receive?

In 2021, and 10% for systems commencing construction in 2022 or thereafter. Any PV system placed in service after 2023, regardless of when it commenced construction, can receive a maximum tax credit of 10%. Typically, a solar PV system that is eligible for the ITC must use new and limited previous obligations.

How much tax deductible is a solar PV Property?

A solar PV property that commenced construction in 2023 is eligible for a 30% ITC, so when the tax basis is \$1,000,000, the 30% ITC reduces tax liability by \$300,000. In the example, the business uses accelerated depreciation to determine what amount of depreciation it will deduct each year from 2025 to 2030.
