Our pick for best customer satisfaction is Blue Raven Solar.

What does a solar company and roofing contractor do?

A partnered solar company and roofing contractor will handle all relevant building permits. Both companies take care of the tedium of filling out forms and working with local officials and inspectors so that the homeowner can focus on more important things. There are a variety of solar panel installation certifications.

Where are solar installation companies located?

Many solar installation companies are located in larger metropolises. Still, with the growing popularity of this energy-saving product, more and more companies are setting up shop in rural areas. The service area of companies will vary, but many will consider anywhere within a 30-minute commute from its home office to be in its area.

What products does a solar power company install?

It manufactures all the products it installs: panels, batteries, inverters, EV chargers, and monitoring app. This allows its products to work together seamlessly to maximize power output and efficiency. It operates in all 50 states, though not in all ZIP codes, either with its own employees or company-certified local installers.

Can I install a new roof if I have solar panels?

Though you can install a new roof while panels are installed, the process of installing a new roof on a roof that already has solar panels is straightforward: Contact the roofing company. It'll assess the solar panel installation, do a roof inspection, and provide options for what type of roofing will work with your specific solar panel system.

Where are solar panels made?

Over 70% of solar panel manufacturers are based in Asia (China, Japan, Korea, and Singapore), and these companies have factories and operations across multiple countries with different operational policy standards.

The average cost to install solar panels is around \$26,600, and most homeowners pay between \$4,500 and \$53,000. Keep in mind that these prices don't consider the federal investment tax credit (ITC), which can effectively reduce those costs by up to 30%.
