Renewable energy comes from unlimited, naturally replenished resources, such as the sun, tides, and wind. Renewable energy can be used for electricity generation, space and water heating and cooling, and transportation. Non-renewable energy, in contrast, comes from finite sources, such as coal, natural gas, and oil.

Company renewable energy

Leading the renewable energy charge for 35 years and counting. We're committed to providing future generations with the means to power their lives in the most economic, environmental and socially responsible ways possible. [Get to Know Us](#)

The Energy to Change the World. We are GE Vernova. We are helping to accelerate the path to more reliable, affordable, and sustainable energy. With a passion for innovation, we deliver a diverse portfolio of leading technologies we are working closely with our customers to help electrify the world while simultaneously working to decarbonize it.

Indian Renewable Energy Development Agency Limited (IREDA) is a Mini Ratna (Category-I) non-banking financial institution under the administrative control of Ministry of New and Renewable Energy (MNRE). IREDA is engaged in ...

It is a major oil and gas company with operations spanning across the entire energy value chain, including exploration, production, refining, marketing and renewable energies. "Our main responsibility is to help provide safe, affordable energy solutions to as many people as possible, while managing energy consumption and the related emissions ...

The tandem push of federal investments flowing into clean energy and pull of decarbonization demand from public and private entities have never been stronger. Moving into 2024, these forces could enable renewables to ...
