## Cooper power systems bayonet fuse

Eaton Cooper Power A Bay-O-Net fuse is ideal for use in a two-fuse protection scheme with a current-limiting backup fuse. In this arrangement secondary faults and overload currents are cleared by the Bay-O-Net fuse and high level faults are cleared by the current-limiting fuse. ... The Bay-O-Net fuse design allows the integral (link) cartridge to be easily field replaceable. High ampere overload links should only be used in Eaton's Cooper Power series silver-plated ...

ELSP current-limiting backup fuse.) If the bayonet fuse will not be used in series with a current-limiting fuse, an isolation link is required. (See Section 240-47.) Bay-O-Net fuses are comparable in cost to internal cartridge fuses but have the advantages of being field-replaceable. Bay-O-Net fuses can easily be coordinated with upstream devices.
