

# Cost of power flow exhaust system

How much does a power flow engine cost?

If you are starting from nothing, the Power Flow system will cost about \$1900 more than the stock system. If you are replacing a serviceable stock system, you will have to absorb the full \$2895 for the Power Flow. If you want dramatically better performance, there's no substitute for more cubic inches--in other words, get an IO-390 engine.

Is Powerflow exhaust worth it?

Re: Powerflow Exhaust, Worth it? The PowerFlow systems seem to produce exactly what they say they will - more power, with slightly higher fuel consumption to go along with it (no free lunch). Gains are especially noticeable at altitude.

Is a power flow system better than a stock exhaust system?

This cost 3 knots off the cruise speed, but yielded a fuel flow some 1.6 gallons per hour better than the stock exhaust system. Thus the speed advantage of the Power Flow system could be traded for a nice fuel saving, if desired.

What is a power flow tuned exhaust system?

The Power Flow Tuned Exhaust System is not just another replacement muffler - it is a vast improvement over the stock Piper exhaust system. Our system is currently installed and flying on more than 750 Cherokees worldwide making it one of the most thoroughly tested and widely accepted performance upgrades for Piper's classic design.

Do power flow tuned exhaust systems come with a money back guarantee?

Every Power Flow Tuned Exhaust System comes with an unconditional 60 day (from time of installation) money back guarantee. If you are not totally satisfied, for any reason, you can return the system for a full refund of your purchase price. Fine Print? You just read it. For lead times and discounts see table below. Polished or Ceramic?
