

Crossroads solar energy project

What is Indiana Crossroads solar?

Indiana Crossroads Solar will be a major economic boon to the state and to White County bringing \$2.6 million in Economic Development Agreement funds that are available for the county to use for priority projects and other special projects.

Who is crossroads solar?

Crossroads is a manufacturing facility producing fully UL-certified solar modules in a 12-MW annual production capacity facility. Our panels are sold regionally to the install community and nationally through Krannich Solar, and are used on houses, farms and commercial buildings throughout the upper Midwest.

What makes crossroads solar different?

Crossroads Solar's signature products include our 60 and 72 cell series of monocrystalline panels, each backed by a 25-year performance warranty. By using our panels, you can be proud of your contribution too! The story of our employees makes our panels different from those of similar construction, capability and quality.

Why should you choose crossroads solar?

We produce high quality solar panels while also creating jobs and life skills for recently released felons. Crossroads Solar is built on the belief that otherwise good people make colossal mistakes. Time spent in prison and criminal records can ostracize people from opportunities.

What is the Crossroads project?

Dubbed by its developers as "the ultimate lifestyle and leisure focused precinct", the project called The Crossroads is anticipated to be a major development for the Rose City at Morgan Park.

Where are crossroads solar panels made?

Made in the USA. At Crossroads Solar, our goal is to produce top quality solar panels with people who have made mistakes, creating second chances and a greener earth one panel at a time. Our employees are released felons who have served their time and earned the opportunity to reenter the workforce with dignity.
