One long beep. The issue: The wattage of the connected devices has exceeded the capacity of the UPS system. You are experiencing a power overload. The solution: First, turn the UPS system off. Next, unplug at least one device from the battery outlets. Then reset the circuit breaker and turn the UPS system back on.

Check that the power switch on the PSU at the back of the computer is in the on position (with the "I" pushed down). Bypass any battery back-up or power strip and connect the power cable directly to the wall outlet. If there were any hardware or software changes just prior to the issue, reverse those changes and test again
