

Cyberpower emergency power system

CyberPower delivers professional power solutions for home, office and data center with complete product lines including UPS, PDUs, Solar Power Systems, Inverters, Power Accessories and Power Management Software.

A a rack/tower UPS with line interactive topology, the CyberPower PFC Sinewave OR1500PFCRT2U provides power protection (using sine wave output) and surge protection for department servers, workgroup servers, network devices, telecom appliances, and high-end audio/video equipment requiring active PFC power source compatibility. The ...

CyberPower OLS2000EA is a high-performance UPS featuring online double-conversion topology, which provides seamless Pure Sine Wave power for mission-critical devices such as NAS and servers, DVRs/surveillance systems, transportation and infrastructure, and emergency systems. It's typically integrated in the back office, server room, and data center environment.

CyberPower OL5KERTHD guarantees power backup protection for IT equipment, servers, workstations, NAS/Storage devices, telecom devices, networking devices, security/emergency systems, and surveillance systems. The UPS adopts double-conversion topology to provide high-quality power output in a compact design. This generator-compatible UPS features hot ...

CyberPower HSTP3T100KE 3-Phase online UPS provides long-lasting power backup for data closets, transportation and infrastructure, and emergency systems. With parallel redundancy capability, the HSTP3T (3-Phase) Series UPS is ideal for critical applications in server rooms, data centers, industrial factories, and power generation plants that require high capacity, high ...

CyberPower CPS3500PRO guarantees high-quality power support for security/emergency system, pump, heater/boiler, generator, lighting, and fans. The emergency power system adopts line-interactive topology and surge protected outlets to offer stabilized Pure Sine Wave output. When connected to additional external batteries and generators, the product provides backup ...

This system can protect valuable belongings and safety by sending a warning signal or notification when an event happens, and it is widely used in home, office, factory and public sector applications. CyberPower Uninterruptible Power Supply (UPS) also comes with various functions that would warn users about battery or power issues.

CyberPower OLS1500ERT2U is a high-performance UPS featuring online double-conversion topology, which provides seamless Pure Sine Wave power for mission-critical devices such as NAS and servers, DVRs/surveillance systems, transportation and infrastructure, and emergency systems. It's typically integrated

Cyberpower emergency power system

in the back office, server room, and data center environment.

CyberPower SL700U guarantees power backup protection for IT equipment, such as computers, NAS, and storage devices. The product adopts standby topology with energy-saving technology to save UPS electricity costs. The product provides battery backup during power outages.

Protect your basement from flooding and gain peace of mind with the A1500SP1 Sump Pump Battery Backup from CyberPower. The A1500SP1 works with an existing sump pump up to 1/2 HP in capacity and ensures sump pump operation for up to two hours*. Installation is simple and no additional components are required, so you can begin backing up your sump pump quickly ...

CyberPower OL1000ERTXL2U guarantees power backup protection for IT equipment, servers, workstations, NAS/Storage devices, telecom devices, networking devices, security/emergency systems, and surveillance systems. The UPS adopts double-conversion topology to provide high-quality power output with additional ECO Mode to conserve power and save on energy costs.

CyberPower HSTP3T40KEBC 3-Phase online UPS provides long-lasting power backup for data closets, transportation and infrastructure, and emergency systems. With parallel redundancy capability, the HSTP3T (3-Phase) Series UPS is ideal for critical applications in server rooms, data centers, industrial factories, and power generation plants that require high capacity, high ...

CyberPower OL8KERTHD guarantees power backup protection for IT equipment, servers, workstations, NAS/Storage devices, telecom devices, networking devices, security/emergency systems, and surveillance systems. The UPS adopts double-conversion topology to provide high-quality power output in a compact design. This generator-compatible UPS features hot ...

Emergencies cannot be predicted but can be prepared by using an alarm system. This system can protect valuable belongings and safety by sending a warning signal or notification when an event happens, and it is widely used in home, ...

CyberPower OLS1500E is a high-performance UPS featuring online double-conversion topology, which provides seamless Pure Sine Wave power for mission-critical devices such as NAS and servers, DVRs/surveillance systems, transportation and infrastructure, and emergency systems. It's typically integrated in the back office, server room, and data center environment.

CyberPower Emergency Power System (EPS) utilize state-of-art microcontroller technology for the supply of lighting, generator, heater, refrigerator, motor, and other apparatus to provide resources during crisis or failure of regular systems.

Every CyberPower product has a unique serial number (S/N) and they can only be 12 or 16 digits. The location of the serial number label may vary by different products, but you can find it on the back or bottom

Cyberpower emergency power system

side of most products.

Looking for power products to use with your Emergency Equipment? CyberPower products listed here are ideal for your power needs in this application. Find more buying guides, product selectors and configurators on our Tools page. If you need help from an expert contact us toll-free at 1 ...

CyberPower OLS3000EA is a high-performance UPS featuring online double-conversion topology, which provides seamless Pure Sine Wave power for mission-critical devices such as NAS and servers, DVRs/surveillance systems, transportation and infrastructure, and emergency systems. It's typically integrated in the back office, server room, and data center environment.

CyberPower OLS3000ERT2UA is a high-performance UPS featuring online double-conversion topology, which provides seamless Pure Sine Wave power for mission-critical devices such as NAS and servers, DVRs/surveillance systems, transportation and infrastructure, and emergency systems. It's typically integrated in the back office, server room, and data center environment.

CyberPower OLS10KERT5U is a high-efficiency UPS featuring online double-conversion topology, which provides seamless Pure Sine Wave power for mission-critical devices such as NAS, servers, DVRs/surveillance systems, transportation, infrastructure, and emergency systems. It's typically integrated into the back office, server room, and data center environment.

CyberPower OR600ERM1U Line-Interactive UPS offers Simulated Sine Wave output power for office system devices including PCs, workstations, networking devices, and peripherals. It's typically integrated in the back office and server room environment to ensure a reliable backup power supply during power failures.
