

Do solar panels need to be serviced

Do solar panels need maintenance?

Let's look a bit further into solar panel maintenance to see what's really necessary and what's not (with proof!), as well as if it makes financial sense to purchase special tools or hire a company to clean your solar panels. From a mechanical point of view, solar panels don't require maintenance.

How do I know if my solar panels need maintenance?

For any other issues, you can request an inspection from your solar installer. They can determine if there's any other maintenance that can be done. Keep a log of any maintenance appointments, as well as cleanings you do yourself. That can help you stay on top of tending to your solar panels. How often do solar panels need maintenance?

Do I need a solar panel upkeep?

When you see a dip in electricity production levels, either on a monitoring app or on your energy bills, then some solar panel upkeep may be required and you should contact your installer. Critically, you should never attempt any internal solar cell maintenance if a panel were to break down and stop working.

Should I perform solar system maintenance on my own?

Do not attempt to perform solar system maintenance on your own! Not only is this a huge safety risk, it may void the warranties from your installer and/or manufacturer. In many cases, cleaning your solar panels should be very hands-off.

How often should solar panels be serviced?

While cleaning your solar panels is important, you should also have your panels serviced regularly by a professional technician. Since home solar systems have very few moving parts, you will only need to book a service visit once per year.

Do solar panels need to be cleaned?

Solar panels are installed at an angle and naturally rinse off with rainfall, so they generally don't need to be cleaned. Still, things like snow, smog, dust, or dirt can cause a dip in your production, especially during times of low rain. In that case, cleaning your solar panels would be beneficial.

Solar panels usually only need to be cleaned once or twice a year, or even less if it rains a lot where you live.. Cleaning your solar energy system helps maximize your panel efficiency by allowing it to absorb the most sunlight possible.
