

Dodge challenge no power to ac system

My 2010 RT AC clutch does not engage when the AC is on. It worked then one day my sun roof would not close. Pulled the negative battery cable for 10-15 minutes and reattached and the roof worked but now the AC doesn't blow cold and found the clutch isn't engaging. My son checked the Freon level and found it on the low side of normal but not ...

The air conditioning system in Dodge Challenger has a condenser coil that sits at the front of the vehicle, and is responsible for releasing the heat from the refrigerant into the ambient air. ... Dodge Challenger AC not blowing hard enough - weak airflow causes; Dodge Challenger bad mass air flow sensor (MAF) symptoms and causes;

Checking and Replacing Fuses in Dodge Challenger. The fuses protect electrical systems against excessive current. When a device does not work, you must check the fuse element inside the blade fuse for a break/melt. Also, please be aware that using power outlets for extended periods of time with the engine off may result in vehicle battery ...

Read Power Distribution Center (PDC) cc; Check fuse #14 (10A - RED) in the PDC (rear power distribution) in the trunk next to the battery. You should be able to visibly see if it is blown (if not leave it out for about 30 seconds and then replace it. Then see if you have AC now):3-smoke:.

Just this weekend I noticed I have no power to my heat/AC control panel. This includes the rear wiper and AC buttons. The only thing that works is the fan. I cannot select airflow zone or adjust temperature. ... 02 Dodge durango 4.7, 32"; goodyear wrangler mtr"s, afe cold air intake, fastman tb, clutch fan delete, transgo shift kit, superchips ...

I insulated the lines in the 09 and the Jeep which helped some. It has not been hot enough here to evaluate the 2015 Challenger A/C but I don't expect any difference since the system looks the same. All that said, no vehicle A/C made today compares to the old GM POA valve systems with the R6 compressor.

Aim the vents straight out. Open all vents then in turn close the various vents and check if any vents do not seem to have as much air flow as the other side's vents. If you find this could arise from vent controls which are not working properly that while you open the vent the vent does not open 100%.

It dumps the refrigerant into the atmosphere to protect the AC system components. If that were the case you would have heard a loud roar (like a jet engine) and a cloud of white vapor coming from under the hood that dissipates quickly. This can happen when the cooling fan(s) fails to come on or not spin fast enough or the system was overcharged ...

Dodge challenge no power to ac system

No. She then wanted to put it in the passenger door storage bin. Hell No! I had her wrap it in a paper towel -- I carry a roll in every car -- and hold it until we reached a place with a trash can. My 2nd hand info is once the A/C system -- which is what I think you are smelling -- develops an odor it is hard to get rid of.

I have pulled the blower motor once hooked it up to a power supply and ran it quite awhile with out and sort of issues with it I'm just not familiar with the Challengers system since I haven't touched it on my car yet. 2010 RT Classic, K& N CAI, 180 T Stat, Predator, Catch Can, Corsa Extreme ... A forum community dedicated to all Dodge ...

Classic Auto Air's systems are not your typical, one-size-fits-all, low-quality, aftermarket air conditioning system. Every component was chosen for its superior design and quality rather than a low cost. ... High Performance / High Efficiency 70 Dodge Challenger AC Kits. PHONE: +(877) 342-5526. My Garage; Support; Tech Talk - Blog ...

The blower motor is the central component of the air conditioning system in Dodge Challenger, responsible for blowing hot or cold air through the AC vents. If the blower motor stops working due to a fault, the air will not flow out of the vents when you switch on the AC in ...

I have 12V to the fuse and it is not blown. I have 12V to the hot side of the relay, tested the relay and it works. When I turn the climate controls on and turn the fan up the diagram lights up. I have taken the blower out and tested it and it does run. I have traced it down to no power to the relay to close it.

these R134a and R1234 systems depend on a specific level of charge. Unlike the old R12 systems, and overcharge is bad for these systems and they won't operate correctly. *Unlike those ads you see on TV for the DIY repair (of adding more)* - not knowing what the issues are and adding more refrigerant wouldn't have solved the issues you experienced.

- Removed AC / Heater Control Unit and checked wires/connectors. All good (no burn smell/marks). I Unplugged them all and plugged back in for safe measure. Started car. AC/Heater Control unit still not working (none of the dials or buttons) I called Dodge to see if they have the AC/Heater Control unit in stock (55111904AE).

No matter where you live if your Dodge Challenger's AC compressor is not turning on, it can turn a pleasant commute into a nightmare (particularly if you have kids that are riding with you). ... It uses a clutch to grab the pulley and cycle coolant through your Challenger's AC system. If this clutch doesn't grab, the AC compressor will ...

A/C-heater controls set to Recirculation mode, full cool, panel mode, high blower and with A/C compressor engaged. If the A/C compressor does not engage, see the A/C System Diagnosis table; All panel outlet vanes open and positioned straight rearward; NOTE: If the following step is not performed, the results of this test will not be accurate. 3.

Dodge challenge no power to ac system

I think the main housing between our system and the dual zone systems are virtually the same, and to make a single system out of a dual system the blend doors are linked together internally to the housing. ... BAS, power windows, sunroof, Keyless Go, Radio, HVAC sensors) that aren't handled by the PCM. 2016 392 Hemi Scat Pack Shaker 23Y pkg (M6 ...

Dodge Challenger AC Is Not Working? RepairPal will help you figure out whether it's your AC Refrigerant Leak, Climate Control Electrical Issue, AC Compressor, or something else. ... and the environment. We do not recommend attempting to recharge the A/C system at home, as products available to consumers tend to contain substances that can cause ...

It sounds like you're dealing with a pesky AC issue on those long drives. I've had similar problems before, and it can be super frustrating. Getting the coolant level checked is a good first step, but if that doesn't fix it, it might be worth having a mechanic take a look at the compressor and overall system.

Classic Auto Air's systems are not your typical, one-size-fits-all, low-quality, aftermarket air conditioning system. Every component was chosen for its superior design and quality rather than a low cost. ... High Performance / High ...

Im working on a drop in replacement system for the 6 speaker system that will be plug and play with current system. the problem with adding most of aftermarket speakers to the oem system without upgrading the amp is your only powering the system with half the available power. Thats because the oem speakers are 2-ohm loads.

2016 Dodge Challenger RT Shaker Plus I've been having this issue where sometimes I'll get no ac/heat fans but the compressor kicks on. Get the blind spot detection not working message, park assist disabled and airbag warning. It seems to happen more in the summer but this might be coincidence.

Now I have no cold air/AC. The blower works fine and the position control works. Any ideas? Thanks! Save Share Reply Quote Like. Sort by Oldest first Oldest first Newest first Most reactions. BlackHemi41. 2804 posts ... // 2016 Dodge Challenger R/T Scat Pack 392, TR-6060, Billet Silver, SPAG.
