

## Duke energy renewable sale

Will Duke Energy sell commercial renewables business to Brookfield renewables?

Duke Energy has agreed to sell its Commercial Renewables business to Brookfield Renewable for about \$2.8 billion. The deal was announced on Monday, June 12 (Reuters).

Will Duke Energy sell its distributed energy business?

Duke Energy is also selling its distributed energy business, which is separate from its utility-scale Commercial Renewables business. Duke Energy (NYSE: DUK), a Fortune 150 company headquartered in Charlotte, N.C., is one of America's largest energy holding companies. The sale of the distributed energy business is expected to close by year-end 2023.

Will Duke Energy sell REC Solar?

"We have received indications of interest for the utility scale business at attractive valuations," Good said. Duke Energy expects to sell its distributed generation business, which includes REC Solar, separately, according to Good. The sale will likely follow a similar timeline to closing as the utility-scale sale, she said.

Does Duke Energy have a good economic outlook?

Duke Energy also maintains a positive outlook for the economy overall, although Good noted the economic forecast remains uncertain. Good seemed particularly keen to tout Duke Energy's performance in the utility sector after announcing that the company would move forward with plans to sell off its commercial renewable energy operations.

How many employees does Duke Energy have?

Duke Energy employs 27,600 people. The company is executing an aggressive clean energy transition to achieve its goals of net-zero methane emissions from its natural gas business by 2030 and net-zero carbon emissions from electricity generation by 2050.

Is Duke Energy a Fortune 150 company?

Duke Energy, a Fortune 150 company, is headquartered in Charlotte, N.C. It is one of America's largest energy holding companies with electric utilities serving 8.2 million customers in North Carolina, South Carolina, Florida, Indiana, Ohio and Kentucky, and collectively owning 50,000 megawatts of energy capacity.
