

Duke energy solar rebate 2021

What is Duke Energy's Solar Rebate program?

Follow Duke Energy on Twitter, LinkedIn, Instagram and Facebook. Duke Energy's \$62 million solar rebate program - which will help North Carolina customers with the upfront cost of installing solar panels on their property - was approved this month by the North Carolina Utilities Commission (NCUC).

Does Duke Energy offer incentives for solar?

Duke Energy does not offer solar incentives or rebate programs for its customers. However, Duke Energy customers can take advantage of the federal solar tax credit if they qualify. The federal tax credit equals 30% of installation costs and directly reduces what you owe in federal income taxes.

Can I get a solar rebate in North Carolina?

Thank you for your interest. This program is only available in North Carolina. To view the NC Solar Rebates page, please select North Carolina as your state. © Duke Energy Corporation. All Rights Reserved. Considering installing solar panels at your home in North Carolina? See how this one-time rebate can make going solar more affordable.

Does Duke Energy have a private solar system in North Carolina?

Currently, in North Carolina, Duke Energy has more than 6,000 customers who have private solar systems - with a total capacity of just over 50 megawatts. The program expects to increase North Carolina's private solar market by 200 percent over the next five years, providing an economic boost for the state's solar installation business as well.

Does a solar battery save Duke Energy?

A solar battery does not save money on Duke Energy bills, but it may be worthwhile if you are interested in having backup power. Energy storage systems can keep your lights on during a power outage, but they tend to cost upwards of \$10,000.

Are solar panels a good investment for Duke Energy customers?

Installing solar panels is a good investment for Duke Energy customers because of net metering. For Duke Energy customers, net metering is a billing arrangement that allows solar system owners to get credit for all the energy their panels generate. This credit can be used to offset the cost of the energy they buy from the grid at night or when the sun isn't shining.
