Who is dynamic solar?

All of our business is conducted face to face in regional NSW. Dynamic Solar is the Central West's leader in Solar design,installation,maintenance and repair or replacement. Based in Bathurst,we service the Central West and beyond.

What is the national community solar partnership?

The U.S. Department of Energy's National Community Solar Partnership tracks progress toward the goal of expanding access to affordable community solar to every household in the United States. One of the ways this is accomplished is by gathering and analyzing community solar project data in three categories:

Where can I find information on community solar projects?

The National Renewable Energy Laboratory's Sharing the Sun Community Solar Project Dataset has more state-level information on community solar projects,including a catalogue of additional community solar capacity currently being planned (but not yet in operation) that will serve low- to moderate-income households.

How much does community solar cost?

The median capacity-weighted NPV of community solar subscriptions is about +\$0.27 per watt (W-AC) through mid-2024. As of August 2024, 24 states and localities, including the District of Columbia, have enacted legislation that enables or requires community solar.

Where can I find information about community solar market tracking?

This community solar market tracking effort,called Sharing the Sun,is conducted by the National Renewable Energy Laboratory (NREL). You can access the most recent project dataset and associated presentations and fact sheets on the Community Solar Resources webpage and on NREL's Sharing the Sun webpage.
