

# Electric companies bill credit solar

Do solar panels get a credit on my electricity bill?

Alternatively, if your solar panels produce more electricity than you use in a given month, you may see a credit on your electricity bill, depending on your utility company's net metering policy. Net metering is a solar incentive that compensates you for excess solar electricity generation.

Do utility companies have to pay for solar electricity?

Therefore, utility companies don't need to compensate their customers for solar electricity sent to the grid. That said, most states currently have active net metering incentives, requiring any investor-owned utility companies (IOU) to offer credit to customers sending excess electricity to the grid.

Can I reduce my electric bill if I go solar?

Ideally, you'll be able to eliminate your electric bill charges after going solar. You may even see some negative bills if you can carry over net metering credits month-to-month. But, as we've explained, this might not be possible if you don't have a great net metering policy, or if you can't install a large enough solar panel system.

What is the Federal residential solar energy credit?

The federal residential solar energy credit is a tax credit that can be claimed on federal income taxes for a percentage of the cost of a solar PV system paid for by the taxpayer. (Other types of renewable energy are also eligible for similar credits but are beyond the scope of this guidance.)

Do I still have an electric bill after installing solar panels?

Yes, you'll still have an electric bill before and after your solar panels are installed and producing clean energy. However, the balance due on your monthly bills will be much lower - or even negative - because your solar production replaces and offsets the cost of buying grid electricity from your utility.

How do Solar credits work?

At the end of each calendar year, any leftover credits are paid to the solar owner at a lower rate based on the utility's wholesale energy cost--generally around 3 to 4 cents per kilowatt-hour.
