

This shift integrates versatile electrical onboard systems/components that were traditionally powered by hydraulic, mechanical, or pneumatic power sources. Electrical power systems for aircraft is a growing, multidisciplinary research field which encompasses aspects of electrical engineering, systems engineering, control theory, and aerospace ...

Electric Power Systems Research is an international medium for the publication of original papers concerned with the generation, transmission, distribution and utilization of electrical energy. The journal aims at presenting important results ...

Electric Power Systems Research is an international medium for the publication of original papers concerned with the generation, transmission, distribution and utilization of electrical energy. The journal aims at presenting important results of work in this field, whether in the form of applied research, development of new procedures or ...

Special Issue from 2022 The 6th International Conference on Power Electronics Systems and Application (ICPESA 2022) Special Issue on Control Interactions in Power Electronic Converter Dominated Power Systems(CIPS Control Interaction) Special Issue on Methodologies and Applications of Digital Twin for Renewable-dominant Power Systems(MADTRES)

Electric Power Components and Systems publishes original theoretical and applied papers of permanent reference value related to the broad field of electric machines and drives, power electronics converters, electromechanical devices, electrical equipment, renewable and sustainable electric energy applications, and power systems.. Specific topics covered include:

International Journal of Energy Research. Volume 44, Issue 9 p. 7136-7157. REVIEW PAPER. Deep learning methods and applications for electrical power systems: A comprehensive review. Asiye K. Ozcanli, Corresponding Author. ... Over the past decades, electric power systems (EPSs) have undergone an evolution from an ordinary bulk structure to ...

International Transactions on Electrical Energy Systems is an open access journal publishing original research results on key advances in the generation, transmission, distribution, and conversion of electrical energy systems. As part of ... Hybrid ANFIS-PI-Based Robust Control of Wind Turbine Power Generation System. Muhammad ...

Special issue on Papers from the 13th International Conference on Power Systems Transients -- IPST 2019 Perpignan, France; Edited by Athula Rajapakse, Maria Cristina Tavares, Mustafa Kizilcay; Special issue on Proceedings of the 21st Power Systems Computation Conference (PSCC 2020); Edited by Daniel Molzahn

The scope covers modelling of power system elements, their design, analysis of their performance and their implementation in specific aspects typical for modern electrical power and energy ...

Energies, an international, peer-reviewed Open Access journal. Journals. Active Journals Find a Journal Journal Proposal Proceedings Series. ... "Advanced Electric Power Systems 2022" is a Special Issue in Energies for those who would like to publish original papers on the generation, transmission, distribution, and utilization of ...

Scope Electric Power Components and Systems publishes original theoretical and applied papers of permanent reference value related to the broad field of electric machines and drives, power electronics converters, electromechanical devices, electrical equipment, renewable and sustainable electric energy applications, and power systems.

Electric Power Components and Systems publishes original theoretical and applied papers of permanent reference value related to the broad field of electric machines and drives, power electronics converters, electromechanical devices, electrical equipment, renewable and sustainable electric energy applications, and power systems. Access this ...

Scope: The scope of the International Journal of Electrical Power & Energy Systems (JEPE) is focused on electrical power generation, transmission, distribution and utilization, from the viewpoints of individual power system elements and their integration, interaction and technological advancement. The scope covers modelling of power system elements, their design, analysis ...

Electric Power Components and Systems is a hybrid open access journal that is part of our Open Select publishing program, giving you the option to publish open access. Publishing open access means that your article will be free to access online immediately on publication, increasing the visibility, readership, and impact of your research.

Welcome to Power System Technology Journal, a leading publication at the forefront of advancements in power systems and electrical engineering. Our journal is dedicated to providing a platform for researchers, engineers, and professionals to share their innovative ideas, research findings, and technological developments in the field of power ...

In this paper, the challenges foreseen for future power systems are identified and the most effective approaches to deal with them are reviewed. The strategies include the development of Smart Grid technologies (meters, sensors, and actuators) coupled with computational intelligence that act as new sources of data, as well as the connection of ...

Scope Electric Power Components and Systems publishes original theoretical and applied papers of permanent reference value related to the broad field of electric machines and drives, power electronics converters,

electromechanical ...

This Journal provides a platform for Publication of Research Article, Reviews and Case studies that focuses on Recent Trends in Electrical Power System in the field of Electrical Engineering. It also focuses on its Recent Developments and Researches in Electrical Power System. Focus and Scope. Conventional Electro Mechanical; Object Oriented System

Konstantin O. Papailiou has spent his entire career of more than 40 years in Power Systems and in particular overhead lines. He received his doctorate degree from the Swiss Federal Institute of Technology (ETH) Zurich and his post-doctoral qualification as lecturer (Dr.-Ing. habil.) from the Technical University of Dresden, where he is also honorary professor.

About the Journal. International Journal of Electrical Power System and Technology : (2455-7293) is a peer-reviewed hybrid open-access journal launched in 2015 that covers many diversified and View Full Focus and Scope... Journal Particulars

select article Corrigendum to & #60;" Analysis of the cloud-to-ground lightning characteristics before and after installation of the coastal and inland wind farms in China">: [Electric Power Systems Research 190 (2021) 106835]

Abstract. The decarbonization of the economy, for which the contribution of power systems is significant, is a growing trend in Europe and in the world. In order to achieve the Paris Agreement's ambitious environmental ...

International Journal of Electrical and Computer Engineering (IJECE), vol. 3, no. 4, pp. 553-560, 2013. ... current will flow through all elements of the electrical power system within predesigned ...

Journal of Electrical Systems. Country. France Universities and research institutions in France ... Electrical and Electronic Engineering: 2010: Q4: ... SJR is a measure of scientific influence of journals that accounts for both the number of citations received by a journal and the importance or prestige of the journals where such citations ...

IEEE Transactions on Power Systems (TPWRS) welcomes papers on the education, analysis, operation, planning, and economics of electric generation, transmission, and distribution systems for general industrial, commercial, public, and domestic consumption, including the interaction with multi-energy carriers. The focus of TPWRS is the power system from a systems viewpoint ...
