Why do you need a backup power system?

It's never fun to have your power suddenly go out when you're in the middle of watching TV or working from home. Whether you're facing severe weather, an overloaded power grid or another unexpected provider outage, having backup power systems in your home can help you carry on with your day or night.

Should you use a battery backup system?

Batteries get that electricity from your home solar system or the electrical grid. As a result, they're much better for the environment than fuel-powered generators. They also might be better for your wallet. Separately, if you have a time-of-use utility plan, you can use a battery backup system to save money on your electricity bill.
