

Energy storage vehicle fares in Luxembourg city

Does Luxembourg have a public charging station?

Luxembourg is supporting this environmentally friendly initiative by providing an extensive network of public charging stations, which are now available on the motorways. The network of public charging points for electric cars and plug-in hybrids was launched in the Grand Duchy in 2017, it was given the name Chargy.

What is Chargy - a public charging station network in Luxembourg?

As part of this project, Luxembourg created Chargy in 2017 - a public charging station network for electric and plug-in hybrid vehicles. The Chargy network in Luxembourg has two types of charging stations: These charging stations have two charging points, which can be adjusted between 3.7 kW and 22 kW, depending on the type of vehicle.

How many ultra-fast charging stations are there in Luxembourg?

With the recent initiatives carried out by private stakeholders, who have installed ultra-fast charging points near motorway junctions, there is now one ultra-fast charging station on the trans-European road transport network in Luxembourg every 20km on average, in both directions.

How does Luxembourg encourage the use of electric and hybrid vehicles?

The government has made a significant effort to encourage the use of electric and hybrid vehicles, which has increased the number of charging stations across the country. In addition, the Luxembourgish government provides financial aid for the purchase of electric or hybrid vehicles.

Why are charging stations popping up in Luxembourg?

More and more charging stations are popping up all over the country to facilitate the use of electric cars. Luxembourg is well aware that in order to combat emissions and fight climate change, new ways of transport are essential.

Does Luxembourg offer financial aid for electric vehicles?

In addition, the Luxembourgish government provides financial aid for the purchase of electric or hybrid vehicles. Residents who purchase an electric or hybrid vehicle can apply for a subsidy of up to 8,000 euros from the government and their annual circulation tax will be reduced.

Energy storage devices for future hybrid electric vehicles. Legislative and voluntary political actions in Europe call for a reduction of CO₂ emissions of a manufacturer's vehicle fleet, rather than for iconic niche products.
