Natural Gas Supply. Eastward Energy has taken several measures to secure a reliable supply of affordable natural gas for our customers. We have entered into long-term transportation contracts to bring natural gas to Nova Scotia from other regions of North America, including the Dawn Hub in Ontario and the Marcellus Shale region in Pennsylvania, where natural gas prices are low ...

Here in Nova Scotia, we're fortunate to have plenty of wind that we can harness to make electricity. In addition to the 600 megawatts of wind we use today, independent power producers will add up to 1,500 megawatts of wind energy, which our team will connect to our system over the next several years.

Question: More Conservation of Energy Team Problem ! Water ( $\rho = 1000 \text{ kg/m}^3$ ,  $\mu = 1.0 \times 10^{-3} \text{ Ns/m}^2$ ,  $g = 9.81 \text{ m/s}^2$ ) is pumped from the reservoir through the piping system shown. The head loss in the pipe from the reservoir to point A is described by  $h_{f,1} = 3.224$ , The head loss in the pipe between points B and C is described by  $h_{f,2} = 1.52$ ?
