

# Ford backup power

What is Ford intelligent backup power?

Ford Intelligent Backup Power allows owners to store up to 131 kilowatt-hours of energy and retrieve up to 9.6 kilowatts of power when equipped with the F-150 Lightning's extended range battery pack, powering a home that uses around 30 kWh of power per day for up to three days, or 10 days when paired with solar power.

Does the Ford F150 have a backup power system?

The Ford F150 Lightning with the extended range battery pack (131 kWh usable) comes with the Intelligent Backup Power system activated upon delivery of the vehicle. This system also requires Ford's Charge Station Pro, an 80-amp charging station.

Does the Ford F150 Lightning have a backup power system?

The Ford F-150 Lightning has Ford's Intelligent Backup Power system, which allows it to be used to power a home during a power outage. There is a lot of interest in this system, as it is the first of its kind in an electric vehicle.

How much power does the intelligent backup power system deliver?

The Ford F-150 Lightning's Intelligent Backup Power system can deliver up to 9.6 kW of power to your home. This is more than most home backup batteries offer and enough to handle most loads in a typical home. You can choose to have the system come on automatically when the power goes out, or turn it on manually at your discretion.

Does intelligent backup power use inverters?

Right off the bat, Alex dispels the myth that Intelligent Backup Power uses the Lightning's inverters that are located in its bed, cabin, and frunk. However, the onboard inverters can be used to power things in one's home, at the very least.

Does Ford offer a home Integration kit?

Ford's home integration kit, which includes an inverter, a transfer switch, and a small battery to initiate the system when the power goes out, must be purchased from partner Sunrun. Sunrun has not yet released pricing on the home integration kit.

F-150 Lightning already has the capability to power the home in the ...

By my math, using the Lightning in this way worked out to being exactly \$17,299.22 less than if we'd gone ahead with the Ford and Sunrun Intelligent Power Backup/Home Integration System route.

With Ford Intelligent Backup Power, enabled by the available 80-amp Ford Charge Station Pro and home integration system, the F-150 Lightning can serve as a reliable home backup energy source by dispatching power to the home during a power outage event. Through this partnership, customers will also be provided with the opportunity to install a ...

The automatic transfer did occur (it took about 10 seconds) and the truck powered my home flawlessly. I ran my entire home for a few hours and then restored power to the house and the system returned to normal operation. My only concern: I never received a notice on my app that I was running on back-up power.
