

Ford backup power

What is Ford intelligent backup power?

Ford Intelligent Backup Power allows owners to store up to 131 kilowatt-hours of energy and retrieve up to 9.6 kilowatts of power when equipped with the F-150 Lightning's extended range battery pack, powering a home that uses around 30 kWh of power per day for up to three days, or 10 days when paired with solar power.

Does the Ford F150 have a backup power system?

The Ford F150 Lightning with the extended range battery pack (131 kWh usable) comes with the Intelligent Backup Power system activated upon delivery of the vehicle. This system also requires Ford's Charge Station Pro, an 80-amp charging station.

Does the Ford F150 Lightning have a backup power system?

The Ford F-150 Lightning has Ford's Intelligent Backup Power system, which allows it to be used to power a home during a power outage. There is a lot of interest in this system, as it is the first of its kind in an electric vehicle.

How much power does the intelligent backup power system deliver?

The Ford F-150 Lightning's Intelligent Backup Power system can deliver up to 9.6 kW of power to your home. This is more than most home backup batteries offer and enough to handle most loads in a typical home. You can choose to have the system come on automatically when the power goes out, or turn it on manually at your discretion.

Does intelligent backup power use inverters?

Right off the bat, Alex dispels the myth that Intelligent Backup Power uses the Lightning's inverters that are located in its bed, cabin, and frunk. However, the onboard inverters can be used to power things in one's home, at the very least.

Does Ford offer a home Integration kit?

Ford's home integration kit, which includes an inverter, a transfer switch, and a small battery to initiate the system when the power goes out, must be purchased from partner Sunrun. Sunrun has not yet released pricing on the home integration kit.

Ford's Intelligent Backup Power relies on the brand's own Charge Station Pro, which is an 80-amp Level 2 home charging station. The station acts as an interface when the truck is plugged in, and it allows the truck's battery to ...

You can purchase your Ford Home Backup Power subscription through the Ford Connected Services tile in FordPass ®*. A one-time fee is only required for standard range F-150 ® Lightning ® trucks and is automatically transferred from owner to owner through to the Vehicle Identification Number (VIN). Extended range F-150 Lightning trucks do not require a one-time fee.

That product doesn't really add much power to what a 60 amp Tesla wall connector does. The Tesla wall connector adds 45 miles per hour to my Model 3, or essentially 11kW/hr. The wall connector is straight AC power, which the onboard AC to DC charger in the car turns to DC power to charge the battery.

The main draw of Ford's automatic bidirectional charging capability (dubbed "Intelligent Backup Power" by the automaker, and "Home Integration System" by Sunrun) is that it's meant to...

First, it's rated at 80 amp, twice the capacity of the average charger, and it enables Ford's Intelligent Backup Power bi-directional charging capacity. With 80 amps of max current, Ford says ...

If Ford F-150 Lightning owners want to access the vehicle's Intelligent Backup Power feature to power their homes during outages they need two main items; besides the F-150 Lightning, of course.

CORRECTED 7/2: Besides supplying 240AC to the Lightnings built-in dual chargers (ER) the Siemens/Ford designed FCSP is actually bi-directional and will take the direct DC power out of the CCS connector and will feed it directly to the Home Integration system where it can be used for house backup after 400V DC to 240V AC inversion.

Home Back Up Power. If the power goes out in your neighborhood, rest easy. * You've got an F-150 Lightning. Home Backup Power uses the energy of your F-150 Lightning to power your home for up to 3 days*. \$1,310.00. ... Alexa Built-in Ford Power-Up: Available first half of 2022.

What is Ford Home Backup Power? Ford Home Backup Power turns your F-150 Lightning ® into a backup generator for your house. It can help mitigate the effects of scheduled outages or rolling blackouts, powering your home even as your house goes off the grid. By my math, using the Lightning in this way worked out to being exactly \$17,299.22 less than if we'd gone ahead with the Ford and Sunrun Intelligent Power Backup/Home Integration System route.

With Ford Intelligent Backup Power, enabled by the available 80-amp Ford Charge Station Pro and home integration system, the F-150 Lightning can serve as a reliable home backup energy source by dispatching power to the home during a power outage event. Through this partnership, customers will also be provided with the opportunity to install a ...

The automatic transfer did occur (it took about 10 seconds) and the truck powered my home flawlessly. I ran my entire home for a few hours and then restored power to the house and the system returned to normal operation. My only concern: I never received a notice on my app that I was running on back-up power.
