

Ford electric truck powering house

Can a Ford F150 be powered by an electric truck?

Now, with the all-electric F-150 Lightning(TM) pickup, Ford is the first in the U.S. to offer the ability for customers to power their homes with an electric truck when the grid goes dark, providing innovative new capabilities that enhance the energy independence of its customers.

Can an electric pickup power a house in a power outage?

Back when the Ford F-150 Lightning Lariat extended range we bought first showed up, we sought to make use of the electric pickup's bidirectional charging capability to power a house in an outage. The \$18,000 quote we received from Ford's partner, Sunrun, quickly relieved this author of that idea.

How does Ford intelligent power work?

Ford Intelligent Power, for example, will allow customers to power their homes with their truck's battery when electricity rates are higher, while charging the truck when rates are lower - or from their own solar-powered rooftop.

How much power does a Ford Lightning provide?

The Ford Lightning can provide up to 9.6 kW of electricity, enough to run a home for up to 10 days if used carefully. Ford's Intelligent Backup Power system works automatically (though it can be manually configured) to switch on when there's an electrical interruption, providing power to the house.

What is Ford intelligent backup power?

Ford Intelligent Backup Power allows the electric F-150 to send its stored electrons to your home during a power outage--as long as you've spent the money on the right equipment.

Can a Ford Lightning pro be used as a home generator?

The Ford Lightning Pro, which is the base trim, is designed for use as a work truck. It comes standard with a 2.4 kW Pro Power Onboard system that features eight 120-volt outlets and eight USB ports, which can be used to power some items in your home or at the worksite.
